# HEAVY ENEMY LOSSES

In the continued heavy fighting against the Indian aggressors, our Army, Navy and Air Force continued to inflict heavy punishment on the enemy in all sectors.

Yesterday, Pakistani troops made further advances in the Indian-held Kashmir and blunted all Indian bids to regain their lost territory in the Punjab plains. Our Army also remained in control of the situation in East Pakistan.

Continuing its hunt and kill mission, the Pakistan Air Force yesterday bombed more air bases in the enemy territory and downed three more Indian planes, thus bringing the total of IAF planes destroyed so far to 108. The Air Force also gave close support to our ground forces and destroyed 48 enemy tanks during the past two days bringing the total number of tanks knocked out to seventyfive.

The Pakistan Navy, in dramatic encounters off the coast of Karachi, attacked and heavily damaged a Russian-built submarine of the Indian Navy, yesterday.

by PAF in  
air, on ground

IN CHAMB,  
EAST PUNJAB

**RAWALPINDI**, Dec. 8: Pakistani troops today continued its determined and steady progress in the sector between Chamb and the cease-fire line in occupied Kashmir, besides capturing a number of villages and posts in the Wagah-Atari and Burki units.

The Pakistan Army also inflicted heavy losses on the Indian Army, especially in the Jammu and Kashmir sector, where the Pakistan Army is fending the enemy determinedly and firmly. The skeletal strength of the Indian Army has been severely depleted, India claims that the Pakistan Army has captured 40 Indian tanks in various sectors along the West Pakistan border during the last two days.

The PAF also continued to kill many enemy planes. Today they shot down four IAF planes and came to attack Sialkot air base in the afternoon. Both aircraft were intercepted and shot down by the Pakistan Air Force. One IAF Hunter was shot down near Suleiman and its pilot, Major Gurbinder Singh, was captured. Yet another IAF plane was hurt by ground fire in this sector, but it could not be confirmed whether it had crashed or not.

With its successes, today, the total number of Indian aircraft destroyed so far (including those shot down) is 108. Around 75 aircraft of the Pakistan Navy goes up to 108. The Indian Navy, which is still in our hands now has risen to 111.

Simultaneously with providing close support to the Army, the PAF is killing IAF aircraft on raiding missions. The PAF continued at attacking Indian air bases for the fourth consecutive day. In the morning our bombers bombed IAF air bases including Jodhpur, Udaipur, Jaipur, etc. In the afternoon, the PAF attack continued till early hours of the morning and all our aircraft returned safely to their bases.

An official spokesman said newsreels had today during a press conference reported that the PAF blasted a number of Pakistani troops in Chamb area are maintaining their con-

## Defence fund set up: Yahya's plea

P.M. - DESIGNATE  
CONFIDENT  
ABOUT VICTORY

It is stated that the Pakistan Navy officials while patrolling the high seas, of the approaches to Karachi, detected Indian submarine in the sector. They opened fire on the submarine and a good hammering in Jammu Army gun shot down two Indian aircraft. One IAF Hunter was shot down by helicopter in Sialkot and Hill were wiped out. The Indian aircraft were captured. Yet another IAF plane was hurt by ground fire in this sector, but it could not be confirmed whether it had crashed or not.

The spokesman added that the two Indian aircraft were shot down by ground fire in Sialkot and Hill were wiped out.

He said that heavy fighting still continues in the Jammu sector and the Indian aircraft were engaged in an offensive mission of our coast.

Wingshields of the Pakistan Navy machines dented to the limit and they dispersed themselves to form a formation for attack. Submarines, in each sector, have been engaged in our sector. The Indian submarine ships were able to evade them and instantly retaliated with torpedoes. Wounded men were sent to the deep water of the Arabian Sea.

In one of the Indian aircraft, one was killed and two others were injured. They were flying over the Arabian Sea, clearly indicating that one of the two submarines had been sunk.

On the other hand, the Indian aircraft was observed on the surface of the sea—a sure sign that they had evaded to the depth of the

territory and are in control of the situation, he added.

KASHMIR

The spokesman said heavy fighting still continues from the PAF in the sector. The Indian aircraft were engaged in an offensive mission of our coast.

He said that heavy fighting still continues in the Jammu sector and the Indian aircraft were engaged in an offensive mission of our coast.

The spokesman added that the two Indian aircraft were shot down by ground fire in Sialkot and Hill were wiped out.
